Dear Friends and Colleagues

Shaukat Khanum Memorial Cancer Hospital and Research Centre welcomes you to the 15th Shaukat Khanum Cancer Symposium (SKCS) in Lahore from November 11 – 13, 2016. This event is now recognized as the premier regional cancer meeting, with a world-class faculty and programme.

SKCS provides an unparalleled platform for delegates to present original research, with state of the art lectures encompassing the latest cancer research, as well as updates on the latest trends in diagnostics, nursing and palliative care. The theme of this year's conference "bringing progress to patients" will focus on how to incorporate new advances in oncology into current practice.

The Scientific Committee has again this year given special consideration to promote and encourage local research by allocating additional sessions for free papers and poster presentations.

The city of Lahore, with its rich history and culture, dating back millennia, promises to be a tremendous host once more. The heritage of Lahore includes its way of life, its people, its beautiful architecture and its exquisite cuisine.

We look forward to meeting you in Lahore!

Asif Loya
