

SPONSOR A CANCER PATIENT

One day, I will become a cricketer and once again win the World Cup for Pakistan

Every day, hundreds of cancer patients walk through the doors of Shaukat Khanum Memorial Cancer Hospital and Research Centre, with hope in their hearts. Hope that they, too, will be able to live to see their dreams come true, one day. Our Sponsor-a-Cancer Patient Programme allows you to assume direct responsibility for the treatment of one or more named cancer patients. This is treatment that most of our cancer patients could not otherwise afford. As a prospective sponsor, you will be provided with profiles of patients along with the expected treatment costs in each case, which you can pay up-front, as a lump sum or in installments. The information provided will help you in selecting a patient for sponsorship. You will receive regular medical updates on the patient you sponsor for the entire period of treatment. You will also be able to celebrate milestones in the treatment of the patient you choose to support, should you so wish, by visiting them in hospital after a surgical procedure, or by writing to them, or sending them a birthday card, for example.

So please join us as we accompany our patients in their journey of hope, and recovery, and help to make their dreams come true.
